**2018-09-27**

# ORCWALL

PL6: Implementation
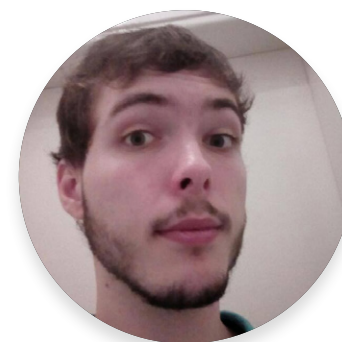

**Francisco Miranda**
BACKEND DEVELOPMENT
GESTOR

**Samuel Outeiro**
BACKEND DEVELOPMENT

**João Simões**
BACKEND DEVELOPMENT

**Eduarda Duarte**
FRONTEND DEVELOPMENT

**Ziga Trontelj**
BACKEND DEVELOPMENT

**Caio Brêda**
FRONTEND DEVELOPMENT

#1 Sprint: 1st week

**ORCWALL**

PL6: Implementation

1. Team

## 2. Effort

3. Results

4. Next week

5. Issues

#1 Sprint: 1st week

notes:
-requirements are late so we invested a part of our time helping and reuniting information so we could start prototyping

| GOALS | HOURS | IN CHARGE | |
|---|---|---|---|
| build mockups and prototype | 3 | All team | |
| have the structure of the website (HTML) and search about API | 6 | João, Samuel, Ziga, Francisco | |
| prepare the structure of the css to implement next week | 1 | All team | |
| search and reunite information for the requirements team * NOT PLANNED | 4 | Caio, Eduarda | |

**ORCWALL**

notes:

-implementing is taking more time since there is lack of searching and details as well as system requirements from the REQ department, which will influence Tests team as well

| GOALS | RESULT | DESCRIPTION |
|---|---|---|
| build mockups and prototype | achieved may be changed | styling is build on a 8pt grid |
| have the structure of the website (HTML) and search about API | achieved | some hard time trying to figure out the system requirements, which affect the formation of a consistent backend |
| prepare the structure of the css to implement next week | incomplete | everything is prepared |
| search and reunite information for the requirements team | achieved | Despite the help, this will affect the next week effort time |

**ORCWALL**

PL6: Implementation

#1 Sprint: 1st week

| GOALS | HOURS | IN CHARGE | |
|---|---|---|---|
| implement css: registration and profile | 2 until: 28-09 | Caio, Eduarda | |
| implement backend to the registration | 5 until: 30-09 | João, Samuel, Ziga, Francisco | |
| implement css to feed | 2 until: 31-09 | Caio, Eduarda | |
| fix any error found by tests | until: 05-10 | Team | |

# ORCWALL

1. Team

2. Effort

3. Results

4. Next week

## 5. Issues

-Should we make the decisions and implement even if there's information lacking frm the system req.?

-Can we correctly use the API provided by the ORCID and make the login iteration shorter?

-Should we implement any Database for the hashtags already?

notes:
-mockups need some retouch to fit the future rquire-ments as well as the structure code that will be affected
